

Wim Grunewald is a bioengineer and obtained his PhD in applied biological sciences from Ghent University in 2008. After having worked as a researcher for 10 years in various fields of molecular plant biology, Wim made the switch to the world of intellectual property. He started at the Innovation and Business team of the Flemish Institute for Biotechnology (VIB), graduated as European Patent Attorney, moved to an IP law firm and was appointed Head of IP at Apeha.bio since 2024. At Apeha.bio, a Belgian agriculture biotech company that develops microbial solutions to enhance crop growth and health, he oversees all intellectual property and legal affairs.
