

PRESENTS

DESIGN OF THE EYE-CATCHING SCIENTIFIC POSTER 2023

(COURSE DESIGNED AND RUN BY CRG PHD STUDENTS)

Apply by: 23rd October 2023

Dates: Wednesday, October 25th (09:30-13:30h)

Friday, October 27th (10:00-12:00h)

Trainers: Helene Tonnele, Ritobrata Ghose, Marta Batet, Anna Oncins, Savvas Kourtis and Vasilis Ntasis

Course description:

In this course you will learn how to create an eye-catching, engaging and effective scientific poster. First we will cover the contents of a poster and elements of design, and then give a crash course on how to use BioRender, Servier Medical Art, Illustrator and Inkscape. Finally, you will have a practical workshop how to effectively present your poster with a flash-talk.

The course is designed for 2nd year PhD students that will present their work at the CRG PhD Symposium, but it's open to everyone that want to have some basics on poster creation.

The course will be online and sessions will be recorded and uploaded to CRG Moodle.
